

ELIZADE UNIVERSITY,  
ILARA-MOKIN, NIGERIA

FACULTY: BASIC & APPLIED SCIENCES

DEPARTMENT: BIOLOGICAL SCIENCES

FIRST SEMESTER EXAMINATION

2018/2019 ACADEMIC SESSION

COURSE CODE: BIO 101

COURSE TITLE: GENERAL BIOLOGY 1

DURATION: 2 HOURS

HOD's SIGNATURE

NAME:.....

MAT. No:.....

INSTRUCTIONS  
ANSWER ALL QUESTIONS

1. Why are Algae referred to as autotrophic organism?

.....  
.....

2. List any four (4) characteristics of Algae you have studied and name any two groups

.....  
.....  
.....  
.....  
.....

3. Distinguish between yeast and mould.

.....  
.....  
.....  
.....  
.....

4. What is a bacteriophage?

.....  
.....

5. State Three (3) differences between sexual and asexual reproduction in living organism

.....  
.....  
.....  
.....

6. Mention Three (3) different forms of **shape** and **arrangement** you have studied in Bacteria

.....  
.....

.....  
.....  
.....  
.....  
.....

7. List Two (2) economic importance of Bryophytes

.....  
.....  
.....  
.....  
.....

8. State Two (2) differences between Bryophytes and Pteridophytes

9. Using their diversity, bacteria classification are based on how many criteria?

.....  
.....

Name them .....

10. In Plants food (carbohydrates) is stored in form of ..... while in Animals food is stored in form of .....

11. Describe the **five** (5) main processes involved in viral replication in a host cell

.....  
.....  
.....  
.....  
.....

12. With the aid of a diagram **only**, describe the life cycle of a bacteria cell?

13. What type of reproduction is found in Bacteria?.....

14. How are Pteridophytes (ferns) different from seed plants?

.....  
.....  
.....

15. The male reproductive organ/cell in bryophytes is called .....while the female organ/cell is called .....

16. Name and state the function of five organelles of plant cell

.....  
.....  
.....  
.....  
.....

17. (a) What are vascular plants?

.....  
.....

(b) Give two (2) examples of the group (s)

.....

18. List the two (2) stages in the life cycle of Bryophytes and which of the stages is dominant

.....  
.....

19. List three (3) Economic Importance of Ferns

.....

.....  
.....  
.....  
.....  
.....

20. What is the main feature that distinguishes angiosperms from gymnosperms?

.....  
.....  
.....  
.....  
.....  
.....  
.....

22. List the adaptive features used by plant to help its survival on terrestrial habitat

.....  
.....  
.....  
.....  
.....

23. What is alternation of generation?

.....  
.....

24. Differentiate between mitosis and meiosis?

.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....

25. List the components of the male and female reproductive organs in flowering plant.

Male.....

Female.....

26. Briefly describe the processes of mitotic division in somatic cells
